About Us

As Star Makina, we are a brand focused on sustainable technologies, embracing an eco-friendly production approach, and prioritizing customer satisfaction. With our Blancus and Staff brands, we deliver high-performance and innovative solutions tailored to the needs of the industry.

By building strong partnerships with our customers, we create not only products but also value. With the durability of Blancus and the innovative spirit of Staff, we continue to make a difference in our sector.

Together, we are working for a better future.

History

As Star Makina, we have been operating in the cleaning equipment industry for over 30 years, taking pride in offering our customers the most innovative solutions. Since our establishment, we have embraced the principles of quality, reliability, and eco-friendly production. With every product we develop, we not only strive for excellent cleaning results but also aim to contribute to a sustainable future.

With our commitment to environmental awareness, we prioritize energy efficiency and the use of recyclable materials in our production processes to minimize our carbon footprint. Our products are designed with eco-friendly technologies, offering durable, long-lasting, and energy-efficient solutions. In this way, we not only simplify our customers' operations but also fulfill our environmental responsibility.

To ensure compliance with international standards, all our products are certified with CE and SGS, guaranteeing quality and reliability. These certifications enable our products to meet high safety and quality standards in both local and global markets. Prioritizing customer satisfaction worldwide, Star Makina has established itself as a leading brand in the industrial cleaning equipment sector.

Our product portfolio includes a wide range of innovative solutions, from carpet and upholstery cleaning machines to industrial vacuum cleaners, as well as low-noise models and specially designed products aimed at reducing the carbon footprint. Each of our products combines high performance, ergonomic design, and durability, ensuring that we meet our customers' expectations at the highest level.

In our vision for the future, we are committed to continuously improving our production processes while keeping up with both technological and environmental advancements. At Star Makina, we strive not only to meet the needs of our valued customers but also to contribute to a cleaner and more sustainable world. With the strength we draw from our past and the support of our customers, we are determined to carry our legacy into the future.

HIGH PRESSURE MACHINES

Cold pressure washing machines are designed with Star Makina's eco-friendly production approach. With high performance and water-saving technology, they provide effective solutions for both professional use and everyday cleaning tasks. Star Makina ensures environmentally responsible cleaning with its sustainability-focused products, allowing you to clean without harming nature.
